

Final Presentation Rubric

Team: 102

| Consideration | Key Evaluation Points | Score |
|----------------------------------|--|-------|
| System Functionality (25 points) | <ol style="list-style-type: none">1. Did the team accomplish a sufficient amount of functionality?2. Did the team achieve what it set out to do?3. Is it useful for the client? Solid work. | 23 |
| Job Quality (20 points) | <ol style="list-style-type: none">1. Did the team present evidence that it did a quality job?2. Did the team improve its performance over time? Liked the stats on sonarqube – especially the cond. coverage | 20 |
| Process and Teamwork (25 points) | <ol style="list-style-type: none">1. Did the team work as a team?2. Did the team use process well or was the project unorganized or poorly organized?3. Was the team able to automate the build, test, and promote processes, especially steps to enhance the backlog to dev connections?4. Did the team flow ideas, improvements, issues or changes between sprints (ideally via the backlog)?5. Did the team recognize short-comings? If so, how well did they work-around the challenges? Nice flow of work, not spikey | 23 |
| Technology Transfer (10 points) | <ol style="list-style-type: none">1. Is the system in shape to be handed over to the client?2. Did they present next steps or recommendations should the project continue in the future? Fine | 10 |
| Presentation (20 points) | <ol style="list-style-type: none">1. Was the presentation clear and did it flow?2. Did everyone participate and contribute to the discussion?3. Was the allotted time managed well?4. Were the presenters clear? The presentation could have been improved by raising the camera angle some so we (the audience) weren't looking up at the presenters. Also, turning around to face the screen to read the text there is not effective. Use notes or put the PC in front of the speaker. | 19 |
| | Total | 95 |

Overall, a very good job. Like the steady / consistent work and the QA commitments. In the report, like the jira gifs with the task against the deliverable. Like the sequence diagrams as well. Using nice icons makes it very presentable.

On getting control over Jenkins, our experience in the past is teams were not able to establish and maintain their own Jenkins. That said, we will create an option for you to host your own Jenkins services in the future.
